

SUBLIME CABINET DESIGN

A UNIQUE AESTHETIC

STYLISH KITCHEN DESIGN

Situated in an intriguing home that backs onto a natural bushland reserve, this kitchen, which was designed and built by Sublime Cabinet Design, had to not only enhance the homeowners' building, but their lifestyle as well.

The clients wanted a space that would act as a centre point for all activities, so it was essential for the design to be innovative, making everyday living easy, and still sophisticated enough to be an entertainer's kitchen on weekends.

It was also important that the kitchen created a strong connection between all key living areas, including the lounge, dining room and outdoor kitchen. To acknowledge and reflect the beauty of the reserve, the clients wanted to bring in elements of nature and ensure the kitchen blended with the bushland setting. They also wanted designated storage spaces, sleek and fresh materials with a focus on state-of-the-art hardware, a design that separated food preparation and presentation areas, and features that would make the kitchen come alive for family gatherings and entertaining guests.

To incorporate the natural elements of the home's surrounds in the kitchen design, it was quickly decided that the glass splashback would be a canvas upon which the external colours of the home, and the site's natural beauty, would be displayed. The stunning custom-designed graphic introduces the vines and bush flowers around the home into the kitchen, and cleverly draws the eye across the glass doors, behind the cooktop and out to the deck.

The simple, natural colour scheme, use of textured woodgrain and minimalist aesthetic further enhances the fusion of the indoors and outdoors, creating a beautiful space.

With storage, preparation and cleaning zones, the kitchen is highly functional as well as striking. The scullery allows for discreet segregation of preparation and cleaning areas, keeping any dirty dishes out of sight, while excellent storage provides plenty of bench space and minimal clutter. The bespoke, fully customised stainless steel sink is another impressive feature of the room.

Sublime Cabinet Design prides itself on thinking outside the box, and strives to create unique kitchens to suit each client's unique needs. The company has been awarded dozens of awards over the years, including principal Kim Duffin's receipt of the Australian Kitchen Designer of The Year award and Australian Large Kitchen Project Designer of The Year from the KBDi in 2011.
