

# TEXTURED FINISH

"A unique blend of materials and finishes come together to form this distinct kitchen, notably the textural laminate cabinetry, which was selected for its attention-grabbing tactile finish. There were some tough restrictions in place as we were only able to use the existing imprint presented, but we managed to come up with a layout that better maximised the space. Planned, dedicated zones including cooking, food preparation, clean-up and dining, makes for an extremely efficient layout. A dual appliance cupboard/pantry with glass sliding doors provides ample storage. Boasting finishes that won't date, the kitchen integrates all spaces and adjoining rooms."

**Designer: Kim Duffin for Sublime Architectural Interiors**
